

JSIAM Annual Meeting Proceedings Template (including abstract, manuscript preparation notes, and manuscript submission notes)

Author 1 Full name¹, Author 2 Full name², Author 3 Full name^{1,2}

¹Affiliation 1, ²Affiliation 2

e-mail: authors1@e-mailaddress

1 Introduction

Proceedings for the presentations (excluding posters) should be prepared within **2 pages in A4 format** (color allowed) as a PDF file with a file size of 1 MB or less. A4 size is 210mm × 297mm. Note that some PDF conversion software uses Letter size (215.9mm × 279.4mm) as the default paper size. Please check the size before submission.

Please use this L^AT_EX template to prepare your manuscript. If you use word processing software other than L^AT_EX, please set the left and right margins to 25mm, the top margin to 20mm, the bottom margin to 30mm, and use 11-point font for the text. Please follow the formatting guidelines in this file for all other aspects.

2 Prohibited Items for Manuscript Preparation

The following are prohibited for manuscript preparation. Note that manuscripts violating these prohibitions may be subject to a request for revision or even rejection for publication. Please pay close attention to the guidelines below.

- 1) Do not change the Margin size
- 2) Do not change the font size
- 3) Do not change the line spacing
- 4) Do not add an abstract or keywords
- 5) Do not use \footnote
- 6) Do not change the column layout
- 7) Do not use \subsubsection
- 8) Do not exceed the page limit (within 2 pages)
- 9) Do not add page numbers

Note: You may make any modifications as long as they do not alter the overall appearance of the template. In particular, do not violate the prohibited items 1) – 9) above.

3 Instructions for Manuscript Submission

Please submit a PDF file, not a L^AT_EX source file, with the necessary fonts embedded. Please submit the manuscript through the annual meeting website.

4 Regarding Font Embedding in PDFs

PDF files without embedded fonts may display incorrectly or cause layout disruption when viewed on systems that do not have those fonts. To be safe, we recommend creating a PDF file with embedded fonts. This is especially important if you are working in an unusual or specialized L^AT_EX setup, or using uncommon fonts.

The organizing committee will not be responsible for any issues, such as character corruption, that occur when printing or viewing PDF files with fonts that are not embedded.

Please understand that we cannot offer assistance with technical matters concerning L^AT_EX, PDF, and font licenses. Please research and resolve these issues on your own.
